## NATIONS DRUG

### WELCOME

If it's been awhile since you last placed an order with FloridaInfusion I want to take this opportunity to welcome you back and let you know that we have missed your business. If you are a loyal customer and have been pleased with our service over the years I want to thank you for your ongoing support. If you are brand new to FloridaInfusion we hope that our new website on-line catalog helps you understand the many benefits of doing business with us and that you will give us a chance to earn your business.

It comes as no surprise that the pharmaceutical business has changed greatly over the past few years. Some of the changes have been extraordinary. New life saving products, money saving generics and information technology lead the list of recent accomplishments. Challenges include government regulation, shrinking reimbursement, rising interest rates, confusing manufacturer contracts, and the rising costs of running a practice that makes showing a profit more difficult than ever.

At FloridaInfusion we are constantly preparing for change. We welcome the challenges change represents and are proactive in providing practical solutions. From a website that offers the latest in on-line ordering, to management information reports, access to pedigrees and important links to clinical information.

Let us hear from you! We want to know what you think!

Tom Magoulis  
Vice President
